

Installing JUnit (1/3)

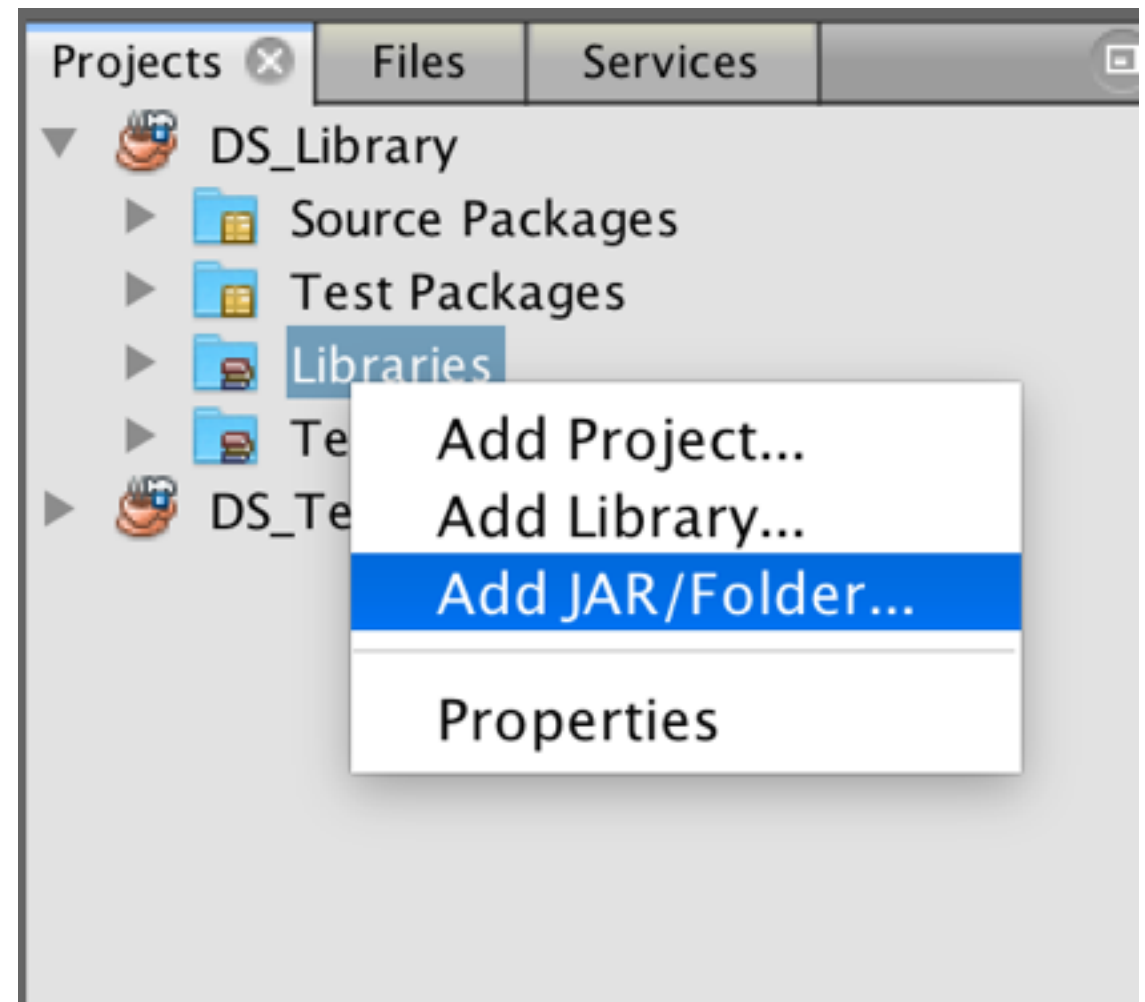

Download from the course page the two jar files listed below.

- `junit-4.12.jar`
- `hamcrest-core-1.3.jar`

It might be best if you create a **JUnit folder** inside of your **NetbeansProjects** folder and place both of these files there.

Installing JUnit (2/3)

Right-click on
Libraries folder in
your project and
select **Add Jar/
folder**

Installing JUnit (3/3)

Select the two jar files
(junit-4.12.jar,
hamcrest-core-1.3.jar).

Select Copy to
Libraries Folder on the
left.

Click Choose.
