

Installing Web-CAT Plugin for NetBeans

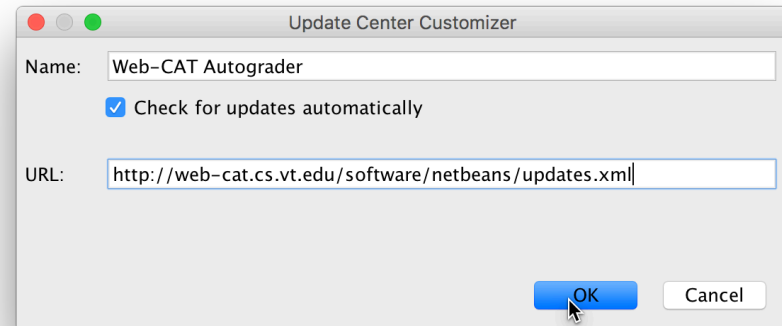

Steps	Images
1. Select Tools > Plugins from the menu bar.	 A screenshot of the NetBeans application's menu bar. The 'Tools' menu is open, and the 'Plugins' option at the bottom is highlighted with a blue selection bar. Other visible options include 'Add to Palette...', 'Internationalization', 'Java Platforms', 'NetBeans Platforms', 'Ant Variables', 'Libraries', 'Servers', 'Cloud Providers', 'Templates', and 'DTDs and XML Schemas'.
2. Select the Settings tab 3. Click the Add button on the bottom right (above the button labeled "Proxy Settings").	 A screenshot of the 'Plugins' dialog box in NetBeans. The 'Settings' tab is selected and active. The dialog shows a list of 'Active' update centers on the left, including 'Certified Plugins', 'NetBeans Distribution', and 'Plugin Portal'. On the right, the 'Certified Plugins' section displays the 'Last Check' time and a URL. At the bottom, there are settings for 'Automatically Check for Updates' (set to 'Every Week') and 'Plugin Install Location' (set to 'Default'). An 'Add' button is visible above the 'Proxy Settings' button.

Installing Web-CAT Plugin for NetBeans

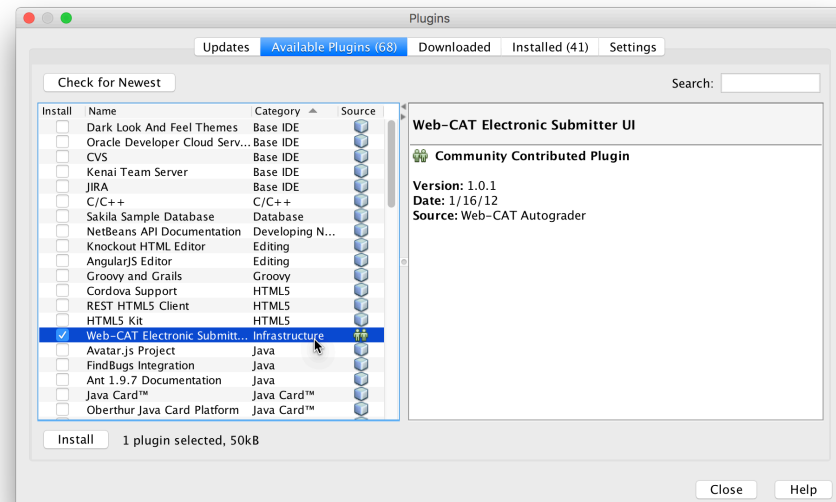

Steps

Images

4. Enter in Name:
Web-CAT Autograder
5. Enter in URL:
`http://web-cat.cs.vt.edu/software/netbeans/updates.xml`
6. Click **Ok**

7. Select the **Available Plugins** tab
8. The plugins in the list are sorted by one of the columns. Click on "Category" and scroll down to the "Infrastructure" category, and *check the box* next to the **Web-CAT Electronic Submitter UI plugin**.
9. Click **Install** and follow the steps in the installer
